Art Unit: 2191

Allowable Subject Matter

Claims 1-26 are allowed.

The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination does not fairly suggest the claimed invention of multiple software components are able to use a single device, and the device should only be controlled by one software component at any given time. In some circumstances a first software component access a network processor to exchange information using a secure network protocol while at other times a second component uses the network processor as a general encryption and/or decryption engine. Specifically, claims 1, 13, 23 and 25 are directed to determining via plurality of flags stored at a PCI device, first software component associated with first function and second component associated with second function, flags are to indicate free or busy, setting flag component to busy, first function access the PCI device if either the second component flag is set to free. Cited art teaches speculation indicator associated with memory location to control but fails to teach speculation indicator control what function the processor will perform and software components are able to use a single device, and the device should only be controlled by one software component at any given time. Therefore, the claimed invention improves on mutual exclusion, progress and deadlock situation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2191

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anil Khatri whose telephone number is 571-272-3725. The examiner can normally be reached on M-F 8:30-5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wei Zhen can be reached on 571-272-3708. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
